

Plant List

Team

An experienced team of experts in die cutting - printing (screen, digital, litho) - laminating - and print finishing. Our studio & structural design & 3D Modeling team.

Die-cutting

These machines will die-cut various materials including FBB, Solid Boards, Corrugated, Correx and Foam Boards.

Large Platen 1680 x 1200mm

Extra large Platen 2700 x 1350mm

Super large die-cutting 1900 x 3000mm

Mounting & Gluing

Machines will glue various materials including FBB, Solid Boards, Corrugated, Correx and Foam Boards and Foamex.

X 2 Semi-automatic edge gluing

X 1 patch laminator 1200mm wide

X1 Valco Melton Semi-auto gluer

Screen Printing

Single colour screen printing services 1350mm x 1850mm multiple coloured work high quality single colour floods and spot UV varnishes.

Digital Printing and Cutting

Prototype / sampling service: flat-bed digital printing for short run production direct to media supported by two KASEMAKE digital prototyping cutting machines.

Flatbed 1 1250 x 2550mm

Flatbed 2 1250 x 2550mm

Flatbed 3 1250 x 2550mm

KASE 1 1350 x 2200mm

KASE 2 1350 x 2200mm

Titanium mulitool & Router 1650 x 4m

Roll to roll Digital Printing

Proofing or posters 1370mm wide X3

Short run film laminating or dry tack gluing application

Assembly & Packing

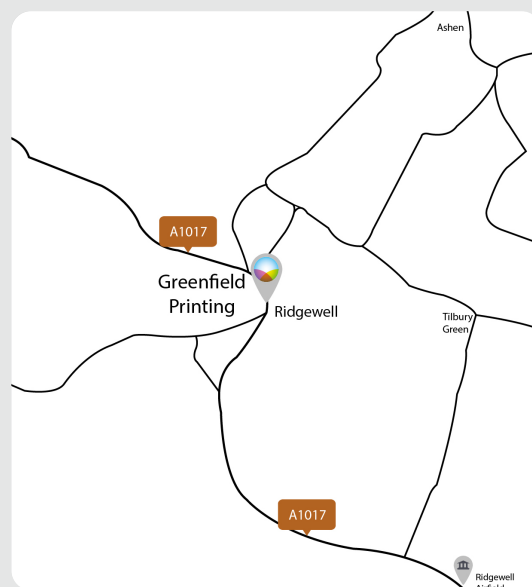

We have full in-house facilities for all types of Hand Assembly, Collation and Packing Processes.

FSDU Construction, Standee and Carton Assembly are just a few of the services we offer.

Distribution

We can organise this for you. Smaller consignments can be delivered by one of our own vans or on an overnight service with a national courier.

Location

Chapel road,
Ridgewell Essex
C09 4RU

Partnered & Contracted Services – Our Commitment to Quality and Transparency

At Greenfield Printing (www.greenfieldprinting.co.uk), we pride ourselves on delivering high-quality print solutions through our extensive in-house capabilities. To ensure we consistently meet our customers' needs—even during periods of high demand or when a project requires specialist equipment—we also work with a small number of carefully selected contracted partners. These partners have the capability to replicate our in-house services and, where required, enhance them with additional processes that allow us to deliver complete end-to-end project solutions.

All contracted partners operate under strict agreements and produce work on our behalf using a fully white-labelled process. This ensures that all goods and services are supplied to you as Greenfield Printing products, with no compromise on quality, consistency, or confidentiality.

We take our responsibilities as a supplier seriously. Every contracted partner is thoroughly audited and assessed for capability, capacity, quality control, and technical expertise. Throughout each project, we oversee all technical and creative elements—from design support to manufacturing techniques—to ensure the final output meets our standards and your expectations.

By combining our in-house production with trusted contracted partners, we ensure that every product delivered is fit for purpose, produced to the correct specifications, and aligned with the high standards that Greenfield Printing is known for.

Additional Services Available Through Our Contracted Partners

- Injection moulding & vacuum forming
- Machine multipart spot and edge gluing
- CNC multi-tool cutting (capable of cutting wood, metal, and plastic)
- Spray booths for a wide range of substrates
- Multiple sites with automatic mounting machines (max sheet size: 1650 × 2500 mm)
- Multiple rotary die cutting presses
- Multiple sites with semi-automatic gluing capabilities
- Semi-automatic and traditional hand-bench screen printing
- Large-format digital printing (EFI Nozomi digital facilities) max sheet 1400mm x 2390mm
- Lithographic printing (A3 up to 1510 × 2050 mm on most substrates)
- Fulfilment and contract packing
- Logistics and storage
